

AgileXPLORES

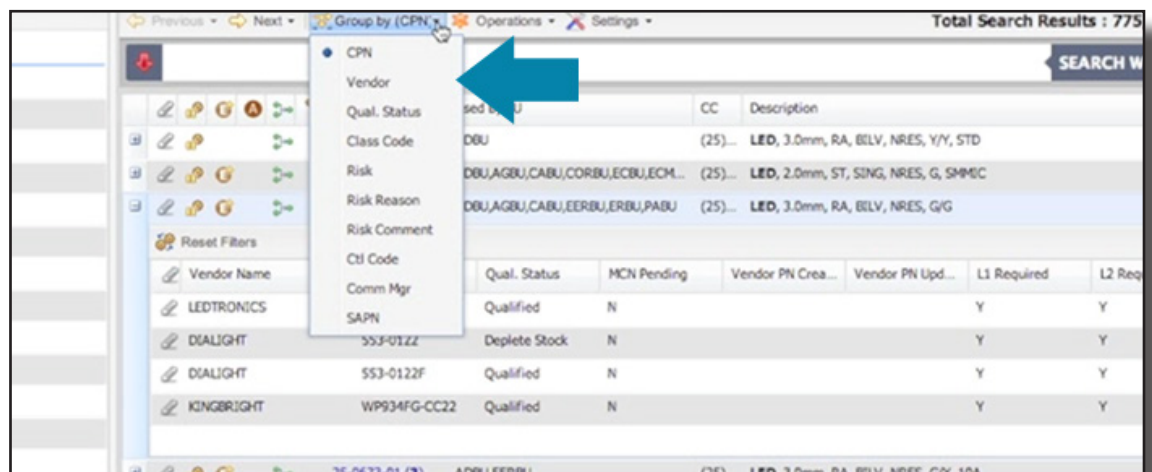

Oracle Agile PLM users can now experience high-performance search capabilities with Amazon-like results when interacting with their product data.

Key Features:

- Sub-second search response
- Search all the Objects in Agile PLM
- Search the History Tab
- Search and Highlight attachment content
- Search refinements (Sort, filter, highlight and group)
- Multi-level BOM and Where-used navigation
- Part and BOM compare
- Easy export to Microsoft Excel

Speed and accuracy you need with Agile PLM data

AgileXPLORES makes finding information as simple as executing a free-text search or browsing through a catalog. Searches provide results with sub-second response times. The intelligent search-based application responds instantly by compiling results and other relevant data from Agile PLM. Users can easily refine their data results as much or as little as they please with features like parametric refinement or additional free-text refinements. The easy-to-use interface allows users to quickly navigate to the right data to make better decision faster.

AgileXPLORES gives users control on how they view their data with features like "Group by", parametric refinement and many others.

Analyze your Agile PLM data like never before

With capabilities such as part and BOM compare, users can take a deeper look into their data. A deeper look into data allows decision makers to better utilize their resources. Ultimately, allowing them to make smarter decisions - faster.

Users can also see their data in different ways through the use of "Where Used", "Vendor Parts" and "Detail" tabs. These tabs provide users with distinct product information that is valuable to the decision-making process.

System Requirements

- Windows 7 & 8

Supported Browsers

- Internet Explorer
- Chrome
- Firefox

Software made simple

Product data is sometimes complex. AgileXPLOER is not. From a wizard-based data connector to the free-text search box, we make getting started easy. Once you are navigating inside of AgileXPLOER, we make it straight forward how to capture and save those searches for later use, along with establishing your own preferences. The application works the way you want it to. The data can be complex, the solution shouldn't be!

Built with everyone in mind

AgileXPLOER was built specifically with the Agile PLM users in mind. Whether they use the system daily or just use it occasionally, with AgileXPLOER, there is something for everyone. For the daily user, you no longer need to know exactly what piece of product data you are looking for, just start typing. For the casual user, you don't have to spend time relearning the system to find what you are looking for. AgileXPLOER allows a wider audience to maximize Agile PLM.

Features	AgileXPLOER Free Edition	AgileXPLOER Multiuser
Target Audience	Single User	Dept/Div/Enterprise
Free Text Search		
Parametric Search		
Guided Navigation		
Automatic Incremental updates to changes in the product data being search		
Supports Searching all Objects in Agile PLM		
Support Document Preview		
Supports Search History TAB		
IT Administration - Security Enabled		
Supports connection to other enterprise and engineering systems		
Cost	Free	Volume Pricing Available
