Product Collaboration Connector

AgileXPLORER for Parts + PC Connector equals full access to all of Agile Product Collaboration.

Extend the deep search capability of AgileXPLORER such as full free-text search, detailed parametric search, and interactive navigation of the rich data contained within your Agile Product Collaboration module. Adding the PC connector will allow users to explore all relevant data contained in the product structure. Understanding how components have been used successfully as well examining revision history for items, assemblies, and individual attributes will enable the engineer to make intelligent choices during part selection. PC Extends AgileXPLORER to the following Agile information:

The PC Connector for AgileXPLORER adds the capabilities of:

BOMs/Where-used	DOCs	History Tab	Change Orders
Gain confidence in your part selection based on proven usage.	Match on key words and phrases to reduce time spent looking for important product information.	Gain an archeological view of past actions by user to help map the future.	Best understand decisions and impact during design process.

Ease of Implementation

What's required to get PC-Connector implemented and in-use? The PC Connector add-on option once enabled, will automatically extend the extraction and indexing to all selected subclasses. Optionally, a tailored jumpstart program is available through our partner network that will help you get even more from the PC Connector and help you to organize your catalog structure, optimize indexing, and promote views to best enable your user community.

How do I get my hands on AgileXPLORER and the PC Connector?

AgileXPLORER for Parts is part of the Oracle Engineering Collaboration CAD Library offering. The capability is specifically housed in the CAD Library Connector SKU sold directly from Oracle. Please see your Oracle sales representatives for further details. If your company already owns Engineering Collaboration and the CAD Library Connector, please contact Perception Software directly as the PC-Connector (along other connectors in the Connector Series) are sold directly from Perception. As a reminder, the PC connector is sold as a perpetual server license with annual maintenance and support is available.
